

SCHOOL OF CONTINUING EDUCATION CORE CURRICULUM

Each component of our 14-class (42-credit) Core is a building block — pieces of an academic experience that complement your major and provide you with a meaningful foundation for success.

The Core begins with **Perspectives on Western Civilization** — a sequence that takes you on an exploration of history’s foremost thinkers and defining events. Next, through **philosophy and theology** courses, you’ll explore what it means to live an ethical and meaningful life. In **natural science, social science, and quantitative reasoning** classes, you’ll become a better problem-solver and critical thinker. **Fine arts, writing, and oral communication** courses will enhance practical skills that are critical to succeed. And through **proficiencies**, you’ll develop skills that are strongly valued by employers.

CORE FOUNDATION (BY NUMBER OF COURSES):

PROFICIENCIES

SCE students are required to complete at least one class that fulfills each proficiency area. These courses may be taken as part of the Core Foundation, your major or electives. All core courses are noted in the course listings in the catalog and online.
